from . . **BRUNES STRAWBERRY NURSERY**

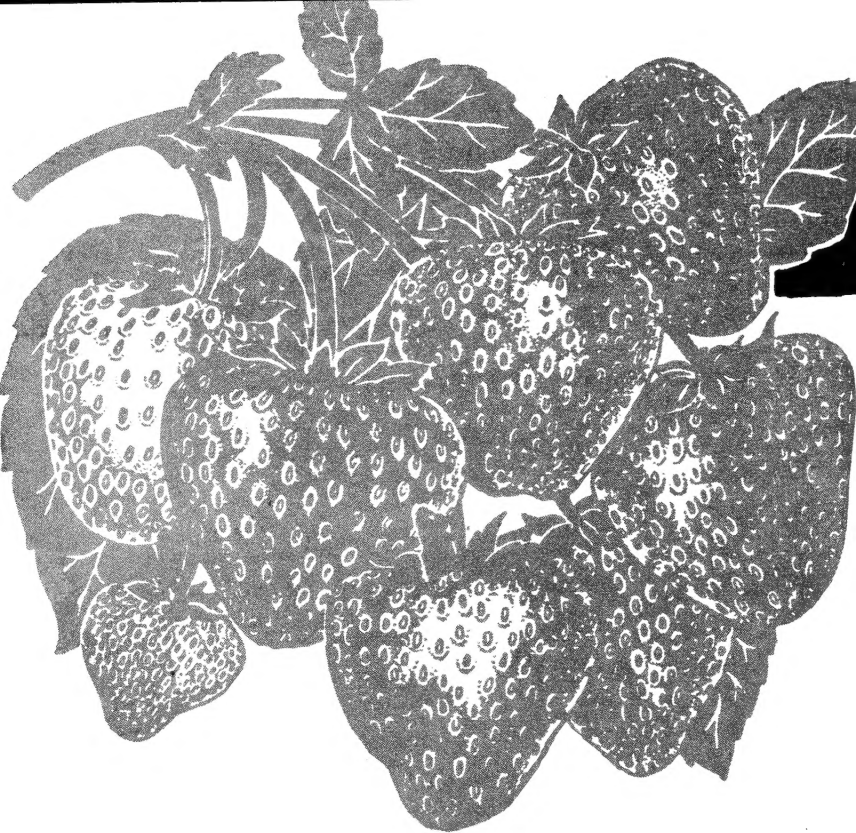

Pequot Lakes
Minnesota

for . .

Sec. 562, P.L.&R.

EIGHT YEARS AGO I began experimenting to see if it were possible to get an everbearing strawberry as large as the Gem or the Mastadon and as sweet as the Wayzata, one that would set runners freely. Today we have several acres of such a berry.

The Berries Are Large

Yes, they are as large as the Wayzata and Gem and ripen even all over the berry; no green tips or part green and part ripe.

Early Ripening

The first berry to get ripe on our place, and goes to work about 60 days after setting out the plants.

It doesn't take long to stem a quart of "Brunes Marvel" as they are free-stem; no core left in the berry. Think of what that means to the busy housewife getting berries ready to serve.

Sweetness

"Brunes Marvel" is truly a lump of sweetness, and saving of sugar in canning and

LESS ACID They Need

... "BRUNES MARVELS" are Excellent for Preserves and for Freezing ...

A New Strawberry *The Everbearer You Want!*

serving. They take only half the sugar for canning, which is a big saving.

Keeping Qualities

Far ahead of other everbearers we have raised.

Many nurseries and growers have sent us very good reports of this berry.

OSLUND'S NURSERY . . . "Everything That's Good and Hardy"

N. N. Oslund, Prop. Cambridge, Minnesota

"I have received your circular about your Brunel Marvel Everbearing Strawberry. . . Your berries are the best Everbearers. They are strong plants, large foliage, fine shape, large berries, and in fact the sweetest of all Everbearers. . . We have grown them for three years.

Yours very truly, N. N. OSLUND"

Stand Dry Weather Better

They go down for moisture, as the roots are exceptionally long. One we dug measured 23½ inches.

Heavy Foliage for Protection

Foliage is heavy enough on our new berry that it helps protect the berries from sunscald and frost.

Get started on this grand new everbearer . . it will pay you.

THE "BRUNES MARVEL" IS DIFFERENT

Quite often we have our customers come up to our berry stand and say, "Wish I could eat strawberries." We ask them to try our new berry, and those that do, come for more and say, these berries didn't cause me any pain!" We have several of our tourist customers who had not been able to eat strawberries for years. Queer as it seems, they can eat their fill of the "Brunes Marvel" without distress.

To Whom It May Concern:

For years I have been unable to eat any strawberries because the acid in them caused pain and much distress. Last summer (1940) Mr. Charles Brunel of Pequot Lakes, Minn., asked me to sample a strawberry he had himself produced from seed. Very much to my surprise and delight I found this particular berry agreed with me and since then I have eaten all I wanted without distress. The berry Mr. Brunel has developed is a large, sweet strawberry, everbearing, and almost entirely free from acid, and I highly recommend it.

MRS. E. M. KENNEY,
(Summer address: 1822 6th Ave.,
Pequot Lakes, Minn.) Des Moines, Iowa

We have raised all the leading everbearers and have sold thousands of quarts of all varieties each season to our tourist trade at our roadside stand here at Pequot Lakes. We now raise most "Brunel Marvel" as our customers prefer them to other varieties. I am still trying to raise other new strawberries and have several very promising plants in our testing rows.

Our Fifth Season With "Brunel Marvels"

This is the fifth season we are offering this new berry plant for sale, and it has been sold by us and shipped to 37 states and Canada so far. It is as early as any strawberry we have ever raised.

We have a nice lot of "Brunel Marvel" plants this year, but the demand for them is greater now, so please order early. We reserve the right to return your money when plants are sold out.

It is usually April 15 before we can dig plants here.

Prices on "Brunel Marvel" Plants

25 or less	10c each
50 for	\$3.50
100 to 500	\$5.00 per 100
1000	\$40.00

ONE-THIRD CASH WITH ORDER

We have a few thousand Minnesota 1166 or Evermore everbearing strawberry plants for sale at the same prices as "Brunel Marvels".

LUSCIOUS

When planting strawberries for your home garden . . make it "BRUNES MARVELS" this year. The finest in strawberries!

Buy direct from the originator, CHARLES BRUNES, Pequot Lakes, Minnesota.

The Berry for the Home Garden and the Berry Farm

OUR GUARANTEE

We guarantee every plant sold by us to be free from any injurious diseases or insects and true to name, and will replace any plants that are otherwise. It is agreed between ourselves and our customers that we shall not be liable for a greater sum than the amount paid us for plants, and will not be responsible for crop failure or damage by weather. We reserve the right to return money in case of a shortage of plants.

Growing Instructions

Plant strawberries as early in the spring as the ground can be worked. Start cultivating and hoeing as soon as planted. Cultivate all summer and keep the weeds out. If possible water them in the EVENING in dry weather. Have the rows 3 to 4 feet apart and plant 18 to 20 inches

in the row. Keep the bud clusters off from 6 to 7 weeks after planting, then let them bear the rest of the summer. Keep most of the runners off if only berries are wanted.

Be sure to thin our Everbearing strawberries the second season when they are matted. Thin them down to very narrow rows, about 4 to 6 inches wide, and you will get more and larger berries.

Care of Plants

Packing for shipment. We pack strawberry plants in fresh moss so they will reach you in the best of condition, and if taken care of as soon as they arrive you will have little or no loss on plants after planting.

When the plants arrive cut the string around them, dip the roots in water and heel them in the ground until you are ready to set them out. Sandy loam is best for strawberries, but reports have come to us that "Brunes Marvel" is doing well on a variety of soils in several states.

We sell thousands of quarts of berries each season to our tourist trade, at Charlie's Place, Highway 371, Pequot Lakes, Minn.
